Professional summary:

Motivated AIML student and aspiring web developer with hands-on experience in Python, JavaScript, and AI-based projects. Strong interest in building real-world applications including AI-powered systems, web applications, and automation tools. Experienced in project-based learning, API integrations, and developing scalable solutions. Seeking an opportunity to apply technical skills in a challenging and growth-oriented environment.

Projects

Deepfake Detection System

Sep 2025

- Developed a deep learning-based system to detect manipulated or AI-generated media using convolutional neural networks.
- Implemented computer vision techniques with OpenCV for frame extraction and preprocessing of video data.
- Trained the model using PyTorch to classify authentic vs. deepfake content and evaluated performance using accuracy and F1-score.

Sentiment Analysis on Social Media Data

Oct 2025

- Built a sentiment analysis pipeline to classify text as positive, negative, or neutral using NLP techniques.
- Used Python libraries for text preprocessing including tokenization, stop-word removal, and vectorization.
- Implemented machine learning models to analyze social media posts and visualize sentiment trends.

Education

Nawab Shah Alam Khan College of Engineering & Technology(NSAKCET)

Sep 2023 – Present

Bachelor of Engineering in Computer Science Engineering(AIML)

CGPA: 8.5

Sri Gayatri jr.College

2023

Intermediate in MPC

Marks: 89%

Technical Stack

- **Languages:** Python, JavaScript , C
- **Frontend:** Tailwind CSS, Flask, React.js, Next.js
- **Backend:** Node.js, Express.js, MongoDB

Certifications

Course Certifications:

- **IBM**
 - Introduction to Agile Development and Scrum
- **Microsoft**
 - Introduction to Generative AI for Developers with Copilot
- **NexGen Coders**
 - Build, Test and deploy ML models
